Swiss
Oskar Boesch

Skills

French, English, German
Python, C++, Swift, Java, Latex, Github, SQL
Wetlab experience
Signal Processing, Machine Learning, and Statistical Analysis

Relevant Experience

- **Leenaards Memory Center, CHUV**
Medical research assistant, fulfilling Swiss civilian service obligations; contributing to clinical research on memory and neurodegenerative disorders.
Aug 2026 - Present
- **Innovation Booster – Digital Health Nation (Innosuisse Grant)**
Developed kinematic data capture software to improve patient recovery and actively participated in pitching the project, presenting to stakeholders, and guiding its translation from concept to a practical solution.
April - June 2025
- **Lake Lucerne Institute**
Internship working on a project of a low budget home assessment tool for upper limb movement quality. Video processing, pose estimation and Android development.
Jun - Jul 2024
- **Swiss Plasma Center**
Internship in the bio-lab SPC on a project of Dielectric Barrier Discharge-based Sterilization.
August 2022

Education

- **Ecole Polytechnique Fédérale de Lausanne**
MSc in Neuro-X, grade average: 5.5/6 – BSc in Life Sciences Engineering, grade average: 5.38/6, incl. exchange at DTU (Denmark).
Master project nominated for the Neuro-X Best Master Project Prize; carried out in Prof. Alexander Mathis's lab on behavioural analysis and machine learning.
Sep 2021 - July 2026
- **Collège Claparède, High School**
Bilingual Maturity in English. Advanced Maths and Physics modules. Astrophysics complementary option. Music prize for both composition and performance, incl. a 6-month exchange at Cairns SHS (Australia).
Aug 2016 - Jun 2020

Additional Information

- Worked on multiple projects during academic studies, including a cognitive science project using General Linear Models (GLM), machine learning projects, and digital signal processing projects.
